Day of Discovery

Join us for an immersive "Day of Discovery" designed for residents and those passionate about advancing their understanding of hair disorders and innovation in practice. This dynamic program will explore the pharmacokinetics of minoxidil and its evolving role in hair restoration, delve into historical and emerging outcome data in androgenetic alopecia (AGA), and examine metrics used in hair clinical trials. Cap off the day with an inspiring conversation with a dermatologist-turned-entrepreneur, offering insights into bridging clinical expertise with business innovation. Whether you are research-driven or entrepreneurial-minded, this event promises to spark curiosity and expand your career horizons.
